

We live in a small city in Nevada. Because our city is small, our choices for radio programming is limited. Except, we enjoy several stations that broadcast into our area via an FM translator. Please do not allow LPFM stations to come to our market and replace our signal for stations like K-Love. There are few family-friendly stations on the air in this market and the loss of K-Love or Air One would be a loss to this community. Thank you. The Russells
